*A water sample includes a comprehensive inspection of the water system by a registered sanitarian, and a water sample is analyzed for Total Coliform and *E.coli* bacteria and a Nitrate/Nitrite pre-screen is conducted. The standards for these tests defined in Ohio Administrative Code (OAC) 3701-28 define a safe source of water from a private water system.

**Chemical water sampling can be performed in varying degrees, for further information contact Carl Preusser at (216)201-2000 ext. 1265 or cpreusser@ccbh.net
