

# Household Sewage System Evaluation For Sanitary Sewer Conversion

The Cuyahoga County Department of Public Works has deemed that the property referenced below is located in an area that is or will soon be accessible to a sanitary sewer. An evaluation of the existing plumbing system, potentially involving a dye test, must be performed to verify the proper connection of all plumbing fixtures and drains and to determine if the required separation of storm water and sanitary wastewater exists. Any corrective actions in response to a failed evaluation must be completed in accordance with all codes and requirements of the State of Ohio, Cuyahoga County Department of Public Works, and the Cuyahoga County Board of Health (CCBH). A plumbing permit must be secured from CCBH prior to the initiation of any plumbing work, as required by the CCBH Plumbing Regulation. All plumbing work conducted under a permit must be inspected by the CCBH Plumbing Inspector. Any plumbing repairs or corrections that do not justify the issuance of a permit shall be inspected by a plumbing inspector certified with the State of Ohio.

## Evaluation Results

### Exterior

Results of Exterior Verification: Pass \_\_\_\_\_ Fail \_\_\_\_\_

Total number of roof downspouts, yard drains, driveway drains, etc. tested: \_\_\_\_\_

If the result is a failing evaluation, identify the drains that are in need of modification or disconnection from the sanitary sewer system:

Roof Drain \_\_\_\_\_ Yard Drain \_\_\_\_\_ Driveway drain \_\_\_\_\_

Other (Please specify) \_\_\_\_\_

### Interior

Results of Internal Plumbing Connection Verification: Pass \_\_\_\_\_ Fail \_\_\_\_\_

If the result is a failing evaluation and a repair, replacement, or an improper connection(s) was identified, describe the plumbing or fixtures that had to be repaired, replaced, connected, or disconnected. Prior to conducting any plumbing work, other than a basic repair to the existing plumbing, a CCBH Plumbing Permit must be secured.

# Documentation of Corrective Actions Taken

## Instructions for completion of this form:

- A. Sketch all structures, driveway, sidewalks, etc. at their approximate location on the lot.
- B. Identify the street and locations of manholes (MH) and storm inlets (SI).
- C. Show the following, using the symbols indicated:
  - SS - approximate location of sanitary sewer
  - # - downstream test manhole or test location for observance of testing dye
  - RD - roof drain / downspout location
  - YD - yard drain location
  - DD - driveway drain location

Front of Structure (to Street)

If necessary, please attach sheets with additional details and sketches.
