

Site Review Requirements for an HSTS Requiring NPDES Coverage

A site drawing that is at least eight and one half (8 ½) inches by eleven (11) inches must be provided. It must include the following information:

- The dimensions of the lot, property line locations, and any right of way boundaries
- Any existing or proposed dwellings and/or structures and the location of any utility service lines or underground drainage lines
- Any existing or proposed site disturbances or hardscapes (driveways etc.)
- The location of all private water systems or surface water features on the lot within fifty (50) feet of the lot boundary or within fifty (50) feet of the proposed STS locations
- Means of access for O&M equipment to service the HSTS
- The North orientation arrow
- Identification on the site drawing of any areas with conditions that would prohibit or impact the siting of an STS (floodways, severe topography, etc.).

Along with the site plan the following must also be included:

- Product information and written description of materials and system components including size of all tanks and details on the design flow
- Manufacturer O&M requirements or instructions for components not addressed in general O&M information available through the Cuyahoga County Board of Health or the Ohio Department of Health
- Any additional information requested by the Cuyahoga County Board of Health related to components, materials, and installation or O&M specifications
