Data provided by Epidemiology, Surveillance, and Informatics at the Cuyahoga County Board of Health www.ccbh.net June, 2016

*Rates were suppressed if there were less than 5 cases during 2007-2011.

Additionally, to help maintain confidentiality, rates were suppressed if the denominator minus the numerator was less than ten. Rates may also be unstable when case counts are less than 16, thus they should be interpreted with caution in this instance.

Data provided by Epidemiology, Surveillance, and Informatics at the Cuyahoga County Board of Health www.ccbh.net June, 2016

*Rates were suppressed if there were less than 5 cases during 2007-2011.

Additionally, to help maintain confidentiality, rates were suppressed if the denominator minus the numerator was less than ten. Rates may also be unstable when case counts are less than 16, thus they should be interpreted with caution in this instance.

*Rates were suppressed if there were less than 5 cases during 2007-2011.

Additionally, to help maintain confidentiality, rates were suppressed if the denominator minus the numerator was less than ten. Rates may also be unstable when case counts are less than 16, thus they should be interpreted with caution in this instance.

*Rates were suppressed if there were less than 5 cases during 2007-2011.

Additionally, to help maintain confidentiality, rates were suppressed if the denominator minus the numerator was less than ten. Rates may also be unstable when case counts are less than 16, thus they should be interpreted with caution in this instance.

Data provided by Epidemiology, Surveillance, and Informatics at the Cuyahoga County Board of Health www.ccbh.net June, 2016

*Rates were suppressed if there were less than 5 cases during 2007-2011.

Additionally, to help maintain confidentiality, rates were suppressed if the denominator minus the numerator was less than ten. Rates may also be unstable when case counts are less than 16, thus they should be interpreted with caution in this instance.

*Rates were suppressed if there were less than 5 cases during 2007-2011.

Additionally, to help maintain confidentiality, rates were suppressed if the denominator minus the numerator was less than ten. Rates may also be unstable when case counts are less than 16, thus they should be interpreted with caution in this instance.

Data provided by Epidemiology, Surveillance, and Informatics at the Cuyahoga County Board of Health www.ccbh.net June, 2016

*Rates were suppressed if there were less than 5 cases during 2007-2011.

Additionally, to help maintain confidentiality, rates were suppressed if the denominator minus the numerator was less than ten. Rates may also be unstable when case counts are less than 16, thus they should be interpreted with caution in this instance.

Data provided by Epidemiology, Surveillance, and Informatics at the Cuyahoga County Board of Health www.ccbh.net June, 2016

*Rates were suppressed if there were less than 5 cases during 2007-2011.

Additionally, to help maintain confidentiality, rates were suppressed if the denominator minus the numerator was less than ten. Rates may also be unstable when case counts are less than 16, thus they should be interpreted with caution in this instance.
